

Associate consultant – Japan and Asia-Pacific / アソシエイトコンサルタント–日本およびアジア太平洋

Contractor, part-time, flexible hours contract (possible full-time conversion)

Remote working / work from home, location: Japan or anywhere

Due to growth in the business, Shawview Consulting is seeking an associate consultant/contractor to support the delivery of projects to clients in the areas of Japanese health policy, pharmaceutical pricing policy and health economics. The position will work closely with the Principal and project teams to develop reports and policy positions, analyse economic and market information on the Japanese, Asia-Pacific and global health markets, conduct product and policy interviews, prepare communication materials, conduct research activities and support business development.

Initially, this entry- to mid-level position is a flexible contractor or part-time role. However, should the business grow sufficiently, a full-time position may be considered. The position can be based remotely where the person can work with flexible work hours, however ideally the person can engage with clients and stakeholders in Japan and be available to participate in at least some project work during Australian office hours. The role would suit someone familiar with the health, pharmaceutical and life science sectors and who has experience in, or knowledge of, pharmaceutical policy, life sciences industry, global health policy and access to medicines issues. The position will initially focus on Japan, but the geographic scope may grow to include other Asia-Pacific markets.

Roles and responsibilities

- Support the project work of Shawview Consulting, as directed by the employer
- Conduct policy, economic, business and legislative research on issues related to pharmaceutical and medical devices, pricing policy and strategies, health economics, HTA, health policy, politics and public affairs, with a particular focus on Japan
- Draft substantive policy documents, research papers, key message documents, presentations and other such materials as directed by the employer
- Conduct, document and analyse interviews with stakeholders on key pharmaceutical products and issues
- Initial focus on the Japanese market, but may expand to include other APAC markets
- Support the Principal in external advocacy in Japan and APAC appropriate to the position
- Attend meetings, represent Shawview Consulting, take minutes, develop action plans, strategy documents, engagement plans and the like
- Provide administrative support for some projects, including organising meetings and interviews, and
- Other activities agreed with the employer.

Job requirements

Essential

- Reliable, trustworthy, possessing both integrity and a sense of humour
- Fluent or native verbal and written communication skills in English and Japanese
- Skills and/or experience in researching, analysing and preparing good quality policy reports, briefing notes, conducting interviews and stakeholder meetings on key policy, health, business, economic and social issues and product issues
- Ability to interpret, present and communicate research in an interesting and engaging way
- Undergraduate degree in economics, health economics, public policy, politics, social sciences, pharmacy, health policy, public health, science, business or similar field
- Good skills with MS Office software (eg. Word, PowerPoint, Excel) or equivalent
- Experience in working virtually and managing virtual meetings (e.g., Teams, Meet, Zoom)
- Well organised, efficient. Good project, administration, problem-solving and secretariat skills
- Ability to engage and build rapport with stakeholders and key contacts
- Flexible self-starter who is adaptable to changing priorities
- Ability to work independently, good teamwork skills and ability to work to tight deadlines
- Ability to work remotely/from home. Comfortable working at odd hours across time zones

Desirable

- Creativity
- Postgraduate qualifications in global health, pharmaceutical economics and policy, health economics, international business, life sciences, social sciences or similar field
- Knowledge of Japanese health and pharmaceutical systems and issues
- Knowledge of other Asian languages
- Knowledge of health, pharmaceutical, life science and medical device industries
- Interest in stakeholder engagement, policy development, strategy, public affairs, communications, and issues management
- Availability for possible occasional international travel

Applications due by **Friday, 8 July 2022**. Only selected applicants will be contacted for interviews.
